

THE STAR IN YOUR MAIL ROOM

When Efficient Franking Plays a Role:
centormail

READY TO PREMIERE IN YOUR MAIL ROOM: centormail.

A SUPERSTAR IN THE MAKING!

Grows According to Your Needs

Does your office need to handle bigger mail franking tasks? The new centormail loves a challenge! The smallest model can be transformed into a “star performer” at any time – with an integrated static scale, dynamic scale, automatic envelope feeder, and postage-accounting software.

A Clever Innovation

Already a hit – **the vertical envelope transport!** Letters in every format – from post card to B4-letter – drawn from a stack and effortlessly franked.

Your “Ticket” to Get Started

A Master Card to activate all functions. Set up and assign department accounts that authorized personnel can access with their individual User Card.

Always Makes an Excellent Impression

Modern ink-jet technology provides clean, low-cost prints. An optional tank system provides even greater efficiency. Letters glide past the print head with minimal contact for whisper-quiet operation. Perfect for every office environment.

A Stand-up Performer

Whatever you wish to mail, you can fill your envelope to the limit. The vertical feeder and envelope transport combine to easily handle and automatically frank letters **up to 20 mm thick**. No competitor even comes close.

A Complete Program

Whatever you wish to frank, the **integrated 5-kilogram static scale** is at your service. It weighs the letter, calculates and displays the correct postage. For oversize packages print the frank on an adhesive label delivered by the integrated **label dispenser**.

Attention to Details

Little things that make a difference. Store adhesive labels, envelopes, etc. in the practical bins under the scale and franking unit.

- AUTOMATIC ENVELOPE FEED
- LABEL DISPENSER
- STATIC SCALE
- FRANKING UNIT
- POWER SEALER
- ENVELOPE TRAY
- STORAGE BINS
- DYNAMIC SCALE
- EXTENDED DEPARTMENT ACCOUNTING

Teamwork: Dynamic Weighing and Franking

The **dynamic scale** – ideal for efficiently handling large amounts of mixed mail.

Automatically identifies the envelope format, thickness and weight (standard, oversize or others). This assures that every letter is franked with the right postage. All at the astonishing pace of 60 envelopes/minute.

A large and easy-to-read **display screen** allows the user to quickly and easily control each franking job. Clear symbols and pictograms guide the user through available postal products, endorsements etc.

Behind the Scenes: Postage Accounting Software

Postage accounting software offers a comfortable solution to managing and tracking postage used by individual departments and franking machines.

Depending on the version available in your country, this integrated software performs a variety of functions: Track as many department accounts as you wish to set up. Monitor up to four franking stations. Generate clear reports on postage consumption for freely-selectable time periods. Optional data export to other applications like Excel.

A Dependable Performer

You direct, and **centormail** does the work! A clearly designed graphic display and intuitive operating scheme guide the user quickly and confidently through all machine functions and registers.

View all relevant settings on one screen: from the calculated postage to a graphic depiction of the selected advertising slogan to remaining available postage.

Advertising That Makes an Impression

In addition to printing a company logo or advertisement (memory for up to 15 images) next to the frank, **centormail** can also print a short text on the envelope. Compose short messages – up to 5 lines, 20 characters per line – much as you write a text-message for your cellular phone.
